

# APPLICATION FOR A TEMPORARY CONNECTION OR A CHANGE TO AN EXISTING CONNECTION

## How much will this cost?

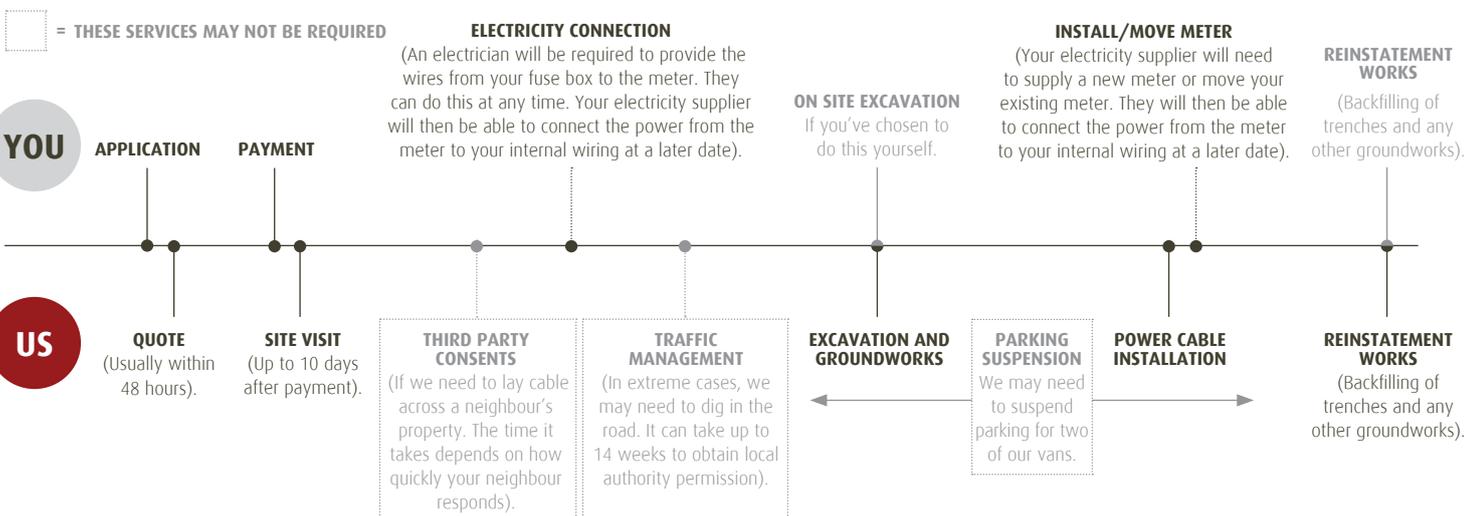

Because of the number of different variables involved, we can't provide an accurate price or give time frames without one of our surveyors visiting your property. We can, however, tell you what customers paid on average and the factors that affect time and cost. You can see this information on our website: [www.ukpowernetworks.co.uk](http://www.ukpowernetworks.co.uk)

If you want to move your existing electricity supply you can find out how much this might cost on our website: [www.ukpowernetworks.co.uk/move](http://www.ukpowernetworks.co.uk/move)

## How long will it take?

We will make every effort to meet your deadlines, but sometimes we are reliant on third parties who we have no control over. If work is required in the public highway or on other people's land our schedule will be affected by the local authority or landowner. For instance, in extreme cases road closures are required to dig on the highway and obtaining local authority permission can take up to 14 weeks.
