

DG mapping tool plan

We hosted our DG mapping tool customer workshop 22 March 2017. Below are the initiatives our customers told us were of high importance. The target dates for delivering the initiatives are within the regulatory year 2017-18. We will keep you informed via the [DG mailing list](#).

Reference	Initiative	Measure
42.17.01	Updates	Relevant data sources updated upon a material impact
42.17.02	Downloadable shape files	Facility for customer to be able to download shape files (.shp) for use on their own data systems
42.17.03	Circuit constraints	Colour coding added to circuits to provide more information on location of constraint
42.17.04	Data set date	Downloadable data files include last updated date
42.17.05	Fault & planned outage information	Review ability to include fault and outage circuit information as to allow customers to choose more optimal sites
42.17.06	User configurable data	Facility included to allow customers to configure available/downloadable data
42.17.07	London heat map	Generation heat map for London provided with associated demand indicator
42.17.08	Help and support	Customers can contact us to arrange a meeting to understand network constraints
42.17.09	Look and feel	Colour of pop-up boxes and text switched
42.17.10	Heat map	Heat map layer updated in line with our Flexible Distributed Generation roll out plan
